

**Fresno Economic Opportunities Commission (Fresno EOC)  
Request for Proposal**

Head Start Data Wiring and Network/Internet/Wireless Access Point Upgrades

E-Rate Funding Year 2019-2020

Form 470 Application Number: **190016373**

January 17, 2019

**Description:**

The purpose of this project is to provide data wiring and upgrade/increase WiFi coverage for 39 Fresno EOC Head Start Centers and Head Start's main administrative offices at 1900/1920 Mariposa Mall, Fresno, CA 93721 and 5422 E. Pine Ave, Fresno, Ca 93727. Non-eligible entities (other Fresno EOC programs) will also share this WiFi service.

The Request For Proposal will be posted to [www.fresnoeoc.org](http://www.fresnoeoc.org).

Email all proposals to:

Greg Streets  
IT Director  
fceoc@erateassist.com

**Proposal Due Date: February 14, 2019 at 1:00 p.m. PST.**

Proposal must include the E-Rate Form 470 Application Number and the service provider SPIN.

All questions must be directed to Greg Streets via email at fceoc@erateassist.com. Answers to questions received will be available via email to all prospective bidders upon request. Phone calls will not be accepted.

Any contract or agreement is contingent on the receipt of an E-Rate discount funding commitment for this application. Fresno EOC reserves the right not to award any contract for this application should it so desire.

Bidders willing to bill for and accept payment only of the non-discount portion of products and services will receive preference in the selection of providers.

**Specifications:**

The scope of this Request for Proposal includes:

1. **WiFi Access.** The provisioning of Ruckus compatible WiFi devices or similar and services for 39 Head Start sites and administrative offices located at 1900/1920 Mariposa St., Fresno, CA 93721 and 5422 E. Pine Ave, Fresno, Ca 93727, including installation and configuration to connect to existing network, and any and all

necessary on-premise equipment. Included replacement or upgrade of wireless controllers and licensing to cover all equipment.

2. Network Switch Upgrade: On-premise equipment needed to support WiFi access and increase network speed. Prefer 1G HP ProCurve or equivalent managed switch w/ PoE for 39 Head Start sites and administrative offices located at 5422 E. Pine Ave, Fresno, Ca 93727. Switches for Head Start administrative offices located at 1900/1920 Mariposa St., Fresno, CA 93721 should be equivalent to HP Aruba 5400R z12 switch series with a minimum of 48 ports. One module should include 4 SFP ports. Provide all wall mounted rack, UPS, and other network equipment as needed for each location.
3. Data Wiring: Install data wiring in Head Start administrative offices for additional Internet access and add additional wiring at 39 Head Start sites to provide complete WiFi coverage. Label all data wiring locations, provide patch panel equipment, wiring management, and wall mounted rack equipment for Head Start sites

Our desire is to install additional technology for staff and increase WiFi access at Head Start and administrative locations to provide complete coverage.
